I'm a third-year student in Software Engineering at the University of Ottawa. I'm a passionate about reading and learning about all kinds of subjects, whether it is technology, history or personal growth.

EXPERIENCE

JANUARY 2022 – MAY 2022

IT DEVELOPER, CANADA REVENUE AGENCY

During my internship at the CRA, I learned about COBOL and Job Control Language (JCL). I assisted the team in maintaining COBOL programs and JCL panels to ensure that no problems occur during their compilation. I also documented the statistics of various benefit programs for clients. I had the chance to work with different people and communicate throughout my time there.

SEPTEMBER 2019 – PRESENT

RECEPTIONIST, OMNICLINIQUE DE L'OUTAOUAIS

The most important skill for a receptionist is communication. With this position I have enhanced my verbal and written communication skills by providing quality customer service to patients or clients. Furthermore, I have improved in time management and organization by helping doctors with their schedules and files. Sometimes, I provide technical support to the staff.

EDUCATION

SEPTEMBER 2020 - PRESENT

BACHELOR'S IN SOFTWARE ENGINEERING, UNIVERSITY OF OTTAWA

I'm in my third year of studies with a GPA of 5.63. Up until now, I have had some projects where I took the leadership of the team and organized a plan to deliver quality product to either a client or a professor. In one project, we used HTML & CSS and Python to build an interactive website for a client.

SEPTEMBER 2015 – JUIN 2020

HIGH SCHOOL DIPLOMA, COLLÈGE NOUVELLES FRONTIÈRES

In high school, I won the leadership award three times and was also the class president for three years. In grade eleven, my friend and I qualified for the regional competition in a science project.

SKILLS

- Developed an interactive website with HTML & CSS
- Built a personal portfolio website using React.js
- Embraced opportunities to learn and gain knowledge in personal and professional life
- Used Microsoft Office software for various means

- Worked with Python and Java to resolve code issues in class
- Utilized IntelliJ, VS Code to write efficient lines of code
- Experienced working with Git and GitHub
- Familiar with Linux environment
- Designed web interfaces using Figma
- Provided guidance and support to peers in their decision making
- Presented and Displayed exposés and prototypes during team projects
- Encouraged and motivated team members
- Drafted reports and essays for various subjects

ACTIVITIES

In my free time, I work on personal projects that help me improve my coding skills. My first personal project was a portfolio website that I built with React.js. It helped me to learn React.js and improve my JavaScript programming. As a tech enthusiast, I always try to keep up with new technologies. I read articles and watch videos to learn about these technologies.
